Professional Summary

Data Science Specialist at Soul AI with an MCA from NIT Jamshedpur (AIR 536 in NIMCET). Works at the intersection of Data Science and AI: building AI agents and agentic workflows, designing Retrieval-Augmented Generation (RAG) systems, developing machine learning models and creating analytics dashboards. Experience across data science, data analytics and technology roles at Soul AI, Upstox, ThinkCogent and Lupin, plus mentoring and teaching 4,000+ students. Skilled in Python, SQL, Pandas, NumPy, Power BI, Tableau, Git and GitHub, and in explaining complex AI ideas in simple language.

Core Skills

- **Artificial Intelligence:** AI Agents, Agentic AI, Multi-Agent Systems, Tool / Function Calling, Retrieval-Augmented Generation (RAG), Embeddings, Vector Databases, LLMs, Prompt Engineering, LLM Evaluation
- **Machine Learning & Data Science:** Machine Learning, Data Science, Data Analytics, Model Building and Evaluation, Pandas, NumPy
- **Analytics & BI:** Power BI, Tableau, MS Excel (including AI in Excel), Power Query, Google Analytics
- **Programming & Databases:** Python, C, C++, SQL, MySQL, SQLite, JavaScript, HTML, CSS
- **Web Development & Deployment:** React, Node.js, AI-assisted web development, GitHub Pages and cloud deployment
- **Tools:** Git, GitHub, MS Office, Google Workspace
- **Creative AI:** AI Film Making, AI Image and Video Generation, AI Voice-over

Professional Experience

Data Science Specialist, Soul AI | *Jul 2025 – Present*

- Work on data science and AI projects involving large language models (LLMs), data analysis and model evaluation.
- Analyse and prepare datasets, and evaluate AI model outputs for quality, accuracy and consistency.
- Use Python to automate data tasks and build AI agent and RAG-based workflows.
- **Technologies:** Python, Pandas, NumPy, SQL, LLMs, Prompt Engineering, RAG, AI Agents, Git, GitHub

Technology Analyst, Upstox | *Oct 2024 – Jul 2025* | Pune, Maharashtra

- Analysed technology and business data on a fintech trading platform to support product and engineering decisions.
- Wrote SQL queries and Python scripts for data extraction, cleaning and reporting.
- Built reports and dashboards to track platform performance and key business metrics.
- **Technologies:** Python, SQL, Excel, Power BI, Git

Data Analyst, ThinkCogent | *Jan 2024 – Jul 2024* | Bengaluru, Karnataka

- Cleaned, transformed and analysed business data to produce insights and regular reports.
- Built interactive dashboards and visualisations for stakeholders.
- **Technologies:** Python, Pandas, SQL, Power BI, Tableau, Excel

Data Analyst, Lupin India | *Mar 2023 – Jun 2023* | Maharashtra

- Analysed pharmaceutical business data and prepared reports using Excel and SQL.
- Cleaned and organised datasets to improve data quality and reporting accuracy.
- **Technologies:** Excel, SQL, Power BI, Python

Web Development Intern, Teachnook (Teachscape Online Learning Services Pvt Ltd) | *Feb 2023 – Apr 2023*

- Completed a Full Stack Development virtual internship.

Prompt Engineer, Outlier

- Wrote and refined prompts to train and improve large language models (LLMs) across a range of tasks.

- Tested AI model outputs for accuracy, reasoning quality, safety and instruction-following, and gave structured written feedback.
- Compared and ranked model responses against clear guidelines to help improve model performance.
- Identified model errors and edge cases, and documented them to support model improvement.
- **Technologies:** LLMs, Prompt Engineering, AI Model Training and Evaluation, Python

Projects

AI Agents, RAG and Agentic AI Projects | Available on request

- Private projects on AI agents, agentic workflows and RAG-based assistants; demonstration on request.

Amazon Sales Analysis Dashboard

- Data cleaning and transformation with Power Query; interactive dashboard in Power BI.
- Sales trend analysis and business intelligence reporting.

Simple-Chat | HTML, CSS, JavaScript, Node.js, Socket.io

- Real-time web chat application with a Node.js backend and Socket.io.

Online Voting System | C++

- Mini voting system for managing voters, running the voting process and viewing results.

SDE Sheet – DSA | C++

- 225+ DSA problems with solutions in C++.

Education

- **Master of Computer Applications (MCA), Computer Science**, National Institute of Technology Jamshedpur | 2021 – 2024
- **Bachelor of Computer Applications (BCA)**, J.S. University | 2021

Research Publications

- *AI-Powered Fraud Detection: Leveraging Machine Learning to Combat Financial Crimes* (2025)
- *Towards a More Secure Two-Tier ATM System: Proposed Enhancements* (2025)

Certifications & Achievements

- AIR 536 in NIMCET Examination
- Google Analytics Individual Qualification
- Web Development Certification
- Problem Solving (Basic and Intermediate), HackerRank
- SQL Certification, HackerRank
- MySQL (Basic)
- Full Stack Development Virtual Internship, Teachnook

Training & Workshop Expertise

Available to conduct hands-on sessions on building AI agents and Agentic AI, RAG, prompt engineering, AI filmmaking, AI in Excel, building and deploying websites with AI, and Git and GitHub.
